Research Interests: Representation Learning, Video Action Understanding, Large Language Models (LLMs), Large Video-Language Foundational Models, Dataset Condensation, Anomaly Detection, GenAI Detection.

Education

- Aug 2017 – Aug 2024  **Ph.D. in Computer Science (GPA: 3.8)**
Center for Research in Computer Vision (CRCV)
University of Central Florida, Orlando, Florida, USA
Advisor: Prof. Mubarak Shah
- Aug 2013 – Aug 2016  **M.Sc. in Intelligent Systems (GPA: 3.8)**
Technical University of Kaiserslautern, Kaiserslautern, Germany
Thesis title: *Violence Detection in Videos*.
- Sep 2006 – Aug 2010  **B.Tech. in Computer Science (GPA: 3.4)**
Jawaharlal Nehru Technological University, Hyderabad, India

Experience

Research

- Aug 2017 – Current  **Graduate Research Assistant at University of Central Florida (CRCV)**
- Deep Intermodal Video Analytics (**DIVA**) program by IARPA:
 - Worked on solving video activity detection in security videos with large field-of-view. Developed models for actor localization and action classification, handling variations in the scale of objects and class imbalance in a multi-label classification setting.
 - Worked on optimizing data pre-processing pipeline to handle large-scale datasets and enable efficient model training.
 - Led the team at UCF and secured first place in ActEV SDL 2020 challenge (ActivityNet Challenge, CVPR-2020) and second position in TRECVID 2019 challenge while competing with other teams from CMU, JHU, UMD, Purdue, IBM, and MIT.
 - Worked on various aspects of real-time action detection system including, building the data pipeline, improving the computational efficiency of models, and deployment of the system.
 - Gait Recognition by CTTSO:
 - Worked on developing a Gait Recognition model using skeleton data and improved the performance of existing RGB-based models with feature fusion.
 - Led the team at UCF to successfully complete the project by achieving all set goals.
 - Biometric Recognition and Identification at Altitude and Range (**BRIAR**) by IARPA:
 - Contributed to the development of a person-identification model aimed at learning robust representations invariant to variations in the scale of individuals resulting from their distance from the camera.
 - Worked on pre-processing the data for model training and building the pipeline for inference and evaluation.
- May 2023 – Aug 2023  **Research Intern at Amazon Inc.**
- Worked on representation learning for long-form video understanding with vision-language training.
 - Explored the idea of leveraging pre-trained Large Language Models (LLMs) to improve temporal understanding of video models.
- May 2022 – Aug 2022  **Research Intern at Pinterest Inc.**

Experience (continued)

- Worked on building a unified model for both image and video representation learning.
- Explored large-scale self-supervised training to learn representations for multiple visual modalities.
- Obtained improved performance over the in-house image-based model using multi-modal training.

Jan 2016 – Aug 2016  **Master Thesis Student at German Research Center for AI (DFKI)**

- Focused on detecting various types of violent activities from videos using visual, semantic, and audio features.
- Trained SVM classifiers on each modality and employed late-fusion to detect videos with violence.

Feb 2015 – Aug 2016  **Research Assistant at German Research Center for AI (DFKI)**

- Project - Kognit: Kognit is a tool developed to help dementia patients. It uses cognitive modeling and mixed reality to augment the cognition of the patients.
- Developed a desktop application in Java, to annotate images required to train a model for object detection.
- Focused on developing a REST-based web-service framework in Java, exposing the functionality of my-CBR (Case-Based Reasoning) system and integrating it with the object detection module.

Software Development

Oct 2016 – July 2017  **Java Developer at XYRALITY GmbH, Hamburg, Germany**

- Worked on developing gaming logic for multi-player strategy games.
- Focused on back-end development working with Wonder frameworks and Web Objects.

Aug 2010 – Aug 2013  **Software Engineer at Progress Software, Hyderabad, India**

- Java and web development involving implementation of various features and bug fixing.
- Built POC for a new use-case involving the integration of existing products.
- Received the best employee of the month award for my efforts.

Patents

- 1 Y. S. Rawat, M. Shah, A. J. B. Rana, **P. Tirupattur**, and M. N. Rizve, *Methods of real-time spatio-temporal activity detection and categorization from untrimmed video segments*, US Patent 11,468,676, Oct. 2022.

Skills

Programming	Python, Java, C++
Deep learning frameworks	PyTorch, Keras, Tensorflow
Tools/Frameworks	OpenCV, Sci-kit, MATLAB
Languages	English, Telugu, Hindi, German (B1)

Awards and Achievements

2022	2 nd place, ActivityNet ActEV Challenge (CVPR)
2021	1 st place, ActivityNet ActEV SDL (CVPR)
2020	1 st place, ActivityNet ActEV SDL (CVPR)
	2 nd place, TRECVID ActEV: Activities in Extended Video
	Best Paper Award at ICPR
	Won ASAPS Challenge, Contest-1 (NIST)
2019	2 nd place TRECVID ActEV: Activities in Extended Video
2017	Awarded UCF ORC Doctoral Fellowship

Professional Activities

- Organized TinyAction ActivityNet Challenge (CVPR 2021, 2022)
- Mentored students of NSF Research Experience for Undergrad (REU) 2019, 2020, 2021 & 2024
- Reviewer for CVPR, ICCV, ECCV, CVIP, ACM-MM, IEEE Transaction on Multimedia, Machine Vision and Applications, etc.
