Summary: Computer Vision and Machine Learning researcher with 8+ years of experience across academia and industry, specializing in image processing, video understanding, representation learning, and multimodal learning. Proven track record of delivering production-ready deep learning solutions with publications in top-tier venues including CVPR, ICML, ACM, and AAAI.

Research Interests: Representation Learning, Video Action Understanding, Large Language Models (LLMs), Large Video-Language Foundational Models, Dataset Condensation, Anomaly Detection, GenAI Detection.

Education

Aug 2017 – Aug 2024

■ **Ph.D. in Computer Science (GPA: 3.8)**

Center for Research in Computer Vision (CRCV)

University of Central Florida, Orlando, Florida, USA

Advisor: Prof. Mubarak Shah

Aug 2013 – Aug 2016

■ **M.Sc. in Intelligent Systems (GPA: 3.8)**

Technical University of Kaiserslautern, Kaiserslautern, Germany

Thesis title: *Violence Detection in Videos.*

Sep 2006 – Aug 2010

■ **B.Tech. in Computer Science (GPA: 3.4)**

Jawaharlal Nehru Technological University, Hyderabad, India

Skills

Programming Languages

■ Python, Java, C++

Deep Learning Frameworks

■ PyTorch, Keras, Tensorflow

Agentic AI Frameworks

■ AWS Strands, AWS Bedrock, LangChain, StreamLit

Cloud Platforms

■ Amazon Web Services, Google Cloud Platform

Deployment & MLOps

■ Docker, Git, Modal, ONNX, Rest APIs

Libraries & Tools

■ Open-CV, scikit-learn, MATLAB

Languages

■ English, Telugu, Hindi, German (B1)

Experience

Machine Learning

Sep 2024 – Current

■ **Machine Learning Researcher at PhotoDay**

- Developing image post-processing services, including background removal (image matting) and spill correction, using deep-learning models. Responsible for dataset curation, model training, evaluation, and deployment:
 - Optimized training pipelines, reducing compute costs by over 30% and accelerating model training.
 - Optimized inference pipelines to lower latency and significantly reduce operational costs.
 - Deployed, monitored, and maintained production-grade models, directly contributing to product revenue growth.
 - Curated and maintained high-quality in-house datasets, improving training robustness and reducing prediction noise.
- Maintained and improved existing computer vision models for photo enhancement and editing tasks, including color correction, retouching and B/W generation.
- Developing agentic AI solutions to augment internal customer support workflows, improving support effectiveness and contributing to increased sales and revenue for photo studios.

Aug 2017 – Aug 2024

■ **Graduate Research Assistant at University of Central Florida (CRCV)**

Experience (continued)

- Deep Intermodal Video Analytics (**DIVA**) program by IARPA:
 - Worked on solving video activity detection in security videos with large field-of-view. Developed models for actor localization and action classification, handling variations in the scale of objects and class imbalance in a multi-label classification setting.
 - Worked on optimizing data pre-processing pipeline to handle large-scale datasets and enable efficient model training.
 - Led the team at UCF and secured first place in ActEV SDL 2020 challenge (ActivityNet Challenge, CVPR-2020) and second position in TRECVID 2019 challenge while competing with other teams from CMU, JHU, UMD, Purdue, IBM, and MIT.
 - Worked on various aspects of real-time action detection system including, building the data pipeline, improving the computational efficiency of models, and deployment of the system.
- Gait Recognition by CTSO:
 - Developed skeleton-based gait recognition models, outperforming RGB baselines via feature-level fusion.
 - Successfully led team deliverables, meeting all contract milestones with enhanced performance metrics.
- Biometric Recognition and Identification at Altitude and Range (**BRIAR**) by IARPA:
 - Contributed to the development of a person-identification model aimed at learning robust representations invariant to variations in the scale of individuals resulting from their distance from the camera.
 - Worked on pre-processing the data for model training and building the pipeline for evaluation.

May 2023 – Aug 2023  **Research Intern at Amazon Inc.**

- Worked on representation learning for long-form video understanding with vision-language training.
- Explored the idea of leveraging pre-trained Large Language Models (LLMs) to improve temporal understanding of video models.

May 2022 – Aug 2022  **Research Intern at Pinterest Inc.**

- Worked on building a unified model for both image and video representation learning.
- Explored large-scale self-supervised training to learn representations for multiple visual modalities.
- Obtained improved performance over the in-house image-based model using multi-modal training.

Jan 2016 – Aug 2016  **Master Thesis Student at German Research Center for AI (DFKI)**

- Focused on detecting various types of violent activities from videos using multi-modal features.
- Trained SVM classifiers on each modality and employed late-fusion to detect videos with violence.

Feb 2015 – Aug 2016  **Research Assistant at German Research Center for AI (DFKI)**

- Project - Kognit: Kognit is a tool developed to help dementia patients. It uses cognitive modeling and mixed reality to augment the cognition of the patients.
- Developed a desktop application in Java, to annotate images required for training object detection model.
- Focused on developing a REST-based web-service framework in Java, exposing the functionality of my-CBR (Case-Based Reasoning) system and integrating it with the object detection module.

Software Development

Oct 2016 – July 2017  **Java Developer at XYRALITY GmbH**, Hamburg, Germany

- Worked on developing gaming logic for multi-player strategy games.
- Focused on back-end development working with Wonder frameworks and Web Objects.

Aug 2010 – Aug 2013  **Software Engineer at Progress Software**, Hyderabad, India

- Java and web development involving implementation of various features and bug fixing.
- Built POC for a new use-case involving the integration of existing products.
- Received the best employee of the month award for my efforts.

Awards and Achievements

- | | |
|------|--|
| 2022 | ■ 2 nd place, ActivityNet ActEV Challenge (CVPR) |
| 2021 | ■ 1 st place, ActivityNet ActEV SDL (CVPR) |
| 2020 | ■ 1 st place, ActivityNet ActEV SDL (CVPR)
■ 2 nd place, TRECVID ActEV: Activities in Extended Video
■ Best Paper Award at ICPR
■ Won ASAPS Challenge, Contest-1 (NIST) |
| 2019 | ■ 2 nd place TRECVID ActEV: Activities in Extended Video |
| 2017 | ■ Awarded UCF ORC Doctoral Fellowship |

Professional Activities

- Organized TinyAction ActivityNet Challenge (CVPR 2021, 2022)
- Mentored students of NSF Research Experience for Undergrad (REU) 2019, 2020, 2021 & 2024
- Reviewer for CVPR, ICCV, ECCV, CVIP, ACM-MM, IEEE Transaction on Multimedia, Pattern Recognition, Machine Vision and Applications, etc.
